Association of College and Research Libraries
(ACRL) 2012 top ten trends in academic
libraries 2012

Communicating value

Libraries are increasingly being asked to demonstrate their value to the institution. This includes providing data on library usage, such as GPA, and the role of the liaison librarian in supporting student success.

Data curation

The National Science Foundation (NSF) is a major funder of research in the United States. It has a large collection of data, including grant proposals, peer-reviewed articles, and research reports. The NSF is working to make this data more accessible to the public and to researchers.

Digital preservation

Libraries are responsible for preserving digital materials for the long term. This includes ensuring that digital files are stored in a secure and accessible manner, and that they are backed up regularly.

Higher education

Libraries are playing an increasingly important role in higher education. They are providing access to digital resources, supporting research, and providing a space for learning and collaboration.

Libraries are also providing a space for learning and collaboration. This includes providing access to digital resources, supporting research, and providing a space for learning and collaboration.

Massive Online Open Course, MOOC) is a type of online course that is open to anyone who wants to take it. It is typically offered by a university or college, and it can be used for credit or for personal enrichment.

Information technology

Libraries are increasingly using information technology to support their services. This includes providing access to digital resources, supporting research, and providing a space for learning and collaboration. The 2012 Horizon Report identifies several key trends in information technology, including (1) the increasing use of mobile devices, (2) the increasing use of social media, (3) the increasing use of cloud computing, (4) the increasing use of big data, (5) the increasing use of artificial intelligence, (6) the increasing use of virtual reality, and (7) the increasing use of augmented reality.

Web-Scale Discovery Service) is a type of library management system that allows users to search for and discover digital resources. It is typically used by libraries to provide access to their digital collections.

Mobile environment

麥肯錫諮詢機構(Market Intelligence & Consulting Institute, 簡稱MIC)
發表的《2014年中國ICT市場發展趨勢》(Perspectives on Mobile
Communications, FPD & LCD TV, Emerging Trends in
ICT, Emerging Smart Devices, Big Data &
Cloud, eBusiness & Innovation, China's Economy &
Industry, Smart Mobile
Devices)指出,2014年中國ICT市場將呈現以下特點:
1. 2013年9月24日, Emerging Smart
Devices, 2013年9月25日, Big Data & Cloud

◎Emerging Smart Devices Emerging Smart
